

# **New Technologies In Your Dental Practice**

**Paul Feuerstein, DMD**

**September 23, 2022**

In an overview of the latest high tech products being integrated in today's practices, learn about products in (not limited to) the following areas: Cameras-digital and intraoral, practice management and social media products and the latest tech products. Follow a basic introduction to the workflow from digital impressions, Conebeam CT, implant and restoration planning, lab processes and other exciting emerging products. All of the new scanners will be described. Also take a look at the new restorative materials as well as 3D printing developments. Specific examples, many which are used in Dr. Feuerstein's private practice, will demystify many products, and help you make intelligent design and purchase decisions. See several interesting new products that have recently come to the marketplace and some that have not yet arrived. If you have already "gone digital" there are plenty of tips and tidbits for you. If you have not gone yet, this course is a must.

## **Learning Objectives**

- Learn about the newest high tech products
- Receive information to help make informed purchase decisions for the practice
- See how the products are used clinically in a typical general practice
